

# Ubuntu and HP PCs

Ideal in today's open, cloud-computing world

HP and Canonical, the company behind Ubuntu, bring you the ideal, cost-effective PC environment for today's cloud-computing world.

Over 25 HP Laptops and Desktops are currently certified to run Ubuntu, giving you the choice of a superb, low-cost, enterprise class client experience.

As more users access cloud-based services, there is increasing openness to the range of desktop devices being used. Many firms and public organizations want to deploy low-cost, easy to manage PC systems and reduce vendor lock-in.

With over 20 million desktop users and countless more server installations, Ubuntu is the world's favourite open-source operating system. With HP certification, backed-up by Ubuntu Advantage – the enterprise support and systems management offering from Canonical – Ubuntu provides a number of benefits for commercial PC users.

#### Ubuntu and HP – the natural choice for enterprise clients

- Ubuntu delivers a full suite of internet and productivity applications
- LibreOffice is a full-featured office suite that's compatible with Microsoft Office™, so users can create, open and edit Word™ documents, Excel™ spreadsheets and PowerPoint™ presentations
- Web applications can be installed directly onto the desktop, so you can access them as quickly as ordinary desktop applications
- With Ubuntu's desktop search feature, users can easily find content online as well as data stored locally
- Ubuntu represents a cost-effective, lightweight and stable thin client solution, with built-in support for application virtualization over Microsoft RDP 7.1.

#### Ubuntu lowers the cost of client computing

Ubuntu is open source. You only pay for services and support from Canonical.

#### Enterprise-class services and support

Canonical provides a range of enterprise support offerings for Ubuntu as part of Ubuntu Advantage, giving you the highest level of confidence in your deployment

Ubuntu long-term support includes free maintenance and security updates for five years, ensuring excellent support across hardware refresh cycles.

#### Systems management

Landscape, part of the Ubuntu Advantage service package, delivers a proven return on investment up to 1,000% over five years when used to manage large numbers of Ubuntu machines, whether physical or virtual.

#### HP and Ubuntu

If you are looking for a cost-effective, easy to manage secure and reliable desktop experience, take advantage of the benefits of Ubuntu and HP PCs. There's no faster or more reliable route to success.
